

Face the new Millennium with a fresh, all-natural look

**All-natural protection from
holiday stress and harsh winter weather
that can damage and wrinkle
your delicate complexion**

Most facial creams are loaded with ingredients that are made in a chemistry lab. Our moisturizers contain only pure, natural botanicals and aromas in an all-natural coconut base. And the only preservative is grapefruit extract.

This healing formula contains 9 times more herbs than other "herbal" creams. The herbs are specially selected for dry or sensitive skin. Enjoy the best of modern technology and traditional Ayurvedic beauty care in a moisturizer that will help protect, regenerate and balance your skin naturally and effectively—day or night.
