

# Youthful Skin Cream reduces fine lines and wrinkles an average of 39% in the first 2 months!

**You wondered if an all-natural skin cream would work—  
Here's astonishing new proof**

**Y**ou'll read more about this remarkable study in the months to come ... but the results in the first 2 months are so good ... we have to share them with you. An independent study which follows widely accepted dermatological standards shows that after just 2 months of use, twice a day, *Youthful Skin Cream*:

- improves skin thickness (youthfulness) an average of 14%
- reduces fine lines and wrinkles an average of 39%
- increases skin hydration an average of 47%
- enhances skin firmness an average of 27%
- augments smoothness and clarity an average of 20%

*Youthful Skin Cream* is all-natural, so the benefits continue to accumulate with regular use. It helps prevent and reverse damage from too much sun, environmental pollutants, synthetic cosmetics and stress.

These results are especially timely. Many women are upset about the current fad in facial care, *alpha hydroxy acids*. The short-term benefits are followed by long-term regrets. Continued use of the harsh acids can damage the skin and lead to premature aging and wrinkles.

Why is *Youthful Skin Cream* so effective? The beauty secret is in the precise knowledge of balanced herbal combination.

- Sensitive Plant (*Lajawanti*) supports nerve regeneration.
- *Gotu Kola* enhances collagen synthesis.
- Saffron helps boost resistance to sun damage.
- Antioxidant vitamins A, C and E curb premature wrinkling.
- We prepare our own herbal extracts using traditional cold-pressed techniques—no chemical solvents.

So treat yourself and your loved ones to the pinnacle of ancient knowledge and modern beauty care. And don't delay, *Youthful Skin Cream* is not only more effective—but still just half the price of synthetic department store brands ... at least until December 31st ... then, who knows?
